

196 MEDIA is a company located in Trento and Rome that aims to offer a complete 360° audio post-production service, encompassing foley, sound design, dialogue editing, and mixing.

By having all these audio departments collaborate simultaneously, we create a unique and special sound in harmony with each client's requests, achieve cost-effectiveness, and adhere to tighter deadlines.

Our team comprises professional audio technicians who have honed their skills and gained experience abroad and re-recording mixers with years of industry experience. This enables us to handle any project with passion, enthusiasm, and meticulous attention to detail.

Both our Trento and Rome headquarters are available to support projects from production to DCP delivery.
