

Skyters Drone - Company Presentation

Skyters Drone is a small company, based in northern Italy, specialising in aerial filming with medium-sized drones (mainly DJI Inspire 2).

We work for various TV stations, production companies and event organisers, in Italy and Europe (in the last year we have carried out work in Greece, Spain, France, Malta, Croatia, Austria, Bulgaria and Switzerland). The standard crew consists of two people (drone pilot and camera operator), with a DJI Inspire 2 drone. On request, it is possible to supplement the crew with an assistant, where the work requires it (e.g. at golf events, or for work in the mountains).

Current customers include brands such as Marvel, Disney, Riva, Sony Pictures, Ferrari, Audi and Abarth, as well as TV networks such as Rai, Prime Video, NHK Tv, Lega Serie A and Golf Tv.

We have also used the drone for live TV broadcasts, in particular these projects:

- Football match “Coppa Italia Final”, in Rome, for the Italian TV Mediaset
- “Nations League” football match, in Milan, for English TV Channel 4
- Concerts at the Arena di Verona, for German TV ZDF
- World Downhill Championships, for Redbull Tv and Italian TV Rai

The drones are flown by experienced operators who meet all legal requirements in European countries. With over 8 years of experience behind it, Skyters Drone is a reference point in Italy for the supply of aerial filming to large production companies, both local and foreign.

Here are some examples of work recently carried out:
